

Home Learning Tasks W.b. 11.05.2020

Hello Year 1,

Well done for another super week of learning at home last week!

This week we are returning to our Traditional Tales theme and looking at 'Jack and The Beanstalk'.

I have put together some resources on Twinkl Go including the story PowerPoint and audio book for you to use if you don't have this story at home! There is also a word mat and some fun interactive Jack and The Beanstalk themed activities on there too!

I will share the code for this on Class Dojo on Monday morning!

Suggested Writing Ideas:

- Monday - Write a character description of your favorite character in the book. This about what they look like, what they like to do, what they are like as a person e.g kind, scary. Remember to use describing words (adjectives) you will earn points for the more adjectives you can include!
- Tuesday – Write a setting description of Jack's house or the top of the Beanstalk. Remember to include your describing words again.
- Wednesday – Draw a picture plan or story map of the story. Try to do this using the structure of beginning, middle, and end for example just think about the beginning first, who was there? What were they doing? Where were they? Add key words/phrases to your plan that will help you with further writing.
- Thursday - Use your picture plan to retell the story. Make sure your retell has a beginning, middle and end just like the story! Your challenge is to include some details from your character and setting descriptions to make your retell more exciting!
- Friday – Think of something Jack could do next. When he returns to his mum...what happens next? Your turn to make it up! Have fun!

Reading/Phonics:

It is important to keep reading whilst at home! Keep accessing your school books and word wallets. Remember you can find more E-books at your reading level on Oxford Owl. Let me know if you need a hand finding your reading level on there! You can also access Phonics Play that we use in School, for free at home at the moment! Try and play some games on here each day to practice your sounds!

<https://www.oxfordowl.co.uk/>

<https://www.phonicsplay.co.uk/#>

Keep accessing Lexia each day too. We recommend 10-15 minutes each day!

Sharing stories with your grownups is also a lovely way to practice your reading.

You can also continue to access the 'Letters and Sounds for home and school' on YouTube Daily at 10.30am

Maths

Please continue to access White Rose home learning for Maths when you can during the week!

These lessons follow on from what we were learning when we were last in school. I will prompt you to these throughout the week.

<https://whiterosemaths.com/homelearning/year-1/>

If you find things tricky remember it is always good to practice with practical resources first!

Keep Active:

- PE with Joe Wicks
- Super Movers
- Cosmic Kids Yoga
- Games in the Garden
- Create Songs and Dances

Topic Projects:

This week's new projects are for Science and Art.

Linking to this week's book of Jack and The Beanstalk, we are going to learn about plants!

The details are below and I will send you little reminders and tasks for these throughout the week. Remember I do not expect these 'topic projects' to all be completed this week! They are for you to access as and when you can alongside your core Maths and English tasks! Keep chipping away at these and the others you have as and when you can at home!

Art/DT

Project 5

Linking to your Science work, I would like you to design and make your own flowering plant! You can use materials that you have around your house. Below are some examples for inspiration.

Follow the process:

- ⇒ Design – Draw and label a design of your flowering plant, you would like to make, in this step think carefully about the materials, their purpose and the overall structure and how you will build/join items together. Remember to think carefully about what you have learnt about the different parts of a plant, ensure you include them all in your design!
- ⇒ Make – Follow your design plan to join all of your materials together. Think carefully in this stage about the construction and if it is fit for purpose.
- ⇒ Evaluate – Take a look at your finished product. Write down what you like about and what you think went really well in the design and make process. Next write what you think you would do differently/better next time. I look forward to seeing your creations!

Other Art activities:

Draw a picture of your garden including flowers/trees.

Take some paper on your daily walk, can you sketch a tree?

Pick a plant or flower that you can see from your house. Sketch and colour it.

Look at pictures of Wild flowers and Garden flowers. Can you draw some and compare them?

Science

Project 2

Plants

Our next area of learning in science is 'Plants'. To start your project, I would like you to look at a plant in your garden or online. Then you can draw the plant in your Science book. Once you have drawn the plant see if you can label all of the key parts of the plant and think about what they may be for on the plant. The following links will be useful for this task. Please enjoy using the interactive games to help you too!

http://resources.hwb.wales.gov.uk/VTC/plants_light_water_to_grow/eng/Introduction/default.htm

<https://www.topmarks.co.uk/r.aspx?sid=2264>

<https://www.bbc.co.uk/bitesize/topics/zpxnyrd>

https://www.softschools.com/science/plants/plant_parts/

<https://www.youtube.com/watch?v=dUBIQ1fTRzI>

After labelling parts of a plant, next I would like you to think about the different types of plants. See if you can find out about the following and give a definition of each and examples of them. You could do this in your garden outside and see how many you can spot.

- Wild plants
- Garden plants
- Evergreen trees
- Deciduous trees

If you can observe growth of plants you already have in your garden or plant any seeds that you may have at home this would be great to watch and record your observations however this is not a must do as I understand you may not all have seeds/plants, just a little extra!

I have also created a lesson on 'Twinkl go' named 'Science –Plants'. In here there are a range of small activities, videos, interactive games, word searches and tools that can be used to support your learning on plants. There is also a small quiz that you could challenge yourself with at the end of your learning about plants!

To access this search 'Twinkl Go' in Google, then select the option to sign in. It will display a box for you to enter a six-digit code. The code for this lesson pack is 'DN9628'. Once you have entered this you will be able to access the resources. If there are any problems with this do not hesitate to contact me on Class Dojo!
